Soft water for your home and your family

Reliable water conditioning solutions for hard water problems

2510 Valve Softeners

The 2510 valve, although primarily a filter valve, is a versatile softener valve. Softeners using this valve are available in automatic calender clock, meter initiated or SE econominder meter initiated regeneration.

Features:

- * Available in capacities with 0.75, 1.0, and 1.5 cubic foot of resin.
- * Calendar clock initiated valves are set to regenerate at preset intervals at 2:00 AM.
- * Demand meter initiated valves are set to regenerate only when needed. The regeneration occurs at 2:00 AM once a preset volume of water has passed through the softener.
- * Electrical: 120V / 60 Hz
